

Currency Trades

This pie chart illustrates the distribution of trades by currency, showing that the most traded currency type is GBP at 38%, followed by USD at 34%, and EUR at 28%

Currency Trade Share

- GBP (British Pound) leads with the highest share, making up 38% of all trades. This suggests stronger trading activity or demand in GBP compared to the other currencies.
- USD (US Dollar) comes second, representing 34% of trades. USD remains a significant part of the portfolio, indicating a balanced preference for dollar-denominated transactions.
- EUR (Euro) has the smallest share at 28%, but still forms over a quarter of the total trades, showing continued relevance and diversity in trade exposure
