

Commodity Vs Trade Types Relations

The heatmap reveals that Gas is the most actively traded commodity, particularly in SELL trades with a count of 19, while Coal has the lowest counts overall.

Observation

- Gas has the highest activity: 13 BUY trades and 19 SELL trades, making it the dominant commodity in trade volume, especially for SELL.
- Power is also actively traded with 12 BUY and 16 SELL trades, showing balanced trading on both sides.
- Oil trades are nearly even with 11 BUY and 12 SELL, suggesting consistent participation in both trade types.
- Coal registers the lowest numbers: 9 BUY and 8 SELL trades, indicating relatively less trading interest or volumes.

Interpretation and Insights

- SELL trades are generally higher than BUY across all commodities, with the largest gap for Gas.
- Traders are particularly focused on Gas and Power, while Coal has noticeably less activity in both BUY and SELL categories.
- The chart provides a clear visual summary of trading preferences segmented by commodity and trade type.
